

**AMENDMENTS TO THE SPECIFICATION:**

Please replace the paragraph beginning on line 9 of page 3, with the paragraph below. No new matter is added.

~~One protocol is known as a Salutation Protocol, which is a product of Salutations Consortium Inc., a working group of a number of companies that represent various facets of the computer industry. These companies provide a wide range of products including computer hardware, software, facsimile machines, copies and online services. The goal is to provide a standard protocol for discovering devices and their capabilities on a network, while concealing the specifics of the underlying protocol and implementation from applications. A feature of the Salutation Protocol is a Salutation Manager that functions as a service broker responsible for managing resource interactions. The Salutation Protocol is not yet commercially deployed, and exists currently as a proposed standard. Details regarding the operation of Salutation can be obtained at [www.salutation.org](http://www.salutation.org).~~
